Portfolio | LinkedIn | GitHub

Summary

Computer Science undergraduate and full-stack developer building scalable, secure web and mobile applications across **React**, **Next.js** and with back-end experience **Node.js**, **Django**, **PostgreSQL**, **MySQL**, and **Supabase**. Comfortable defining solution designs, writing clean and well-documented code, driving code reviews, and coordinating across teams to resolve issues and ship features. Experienced mentoring interns and junior developers, with strong analytical and problem solving skills and fluent English communication.

Technical Skills

Frontend:	React.js, Next.js, React Native (Expo), TypeScript, JavaScript (ES6+), HTML, CSS, Tailwind CSS
Backend:	Node.js, Express.js, Django, REST APIs, JWT Authentication
Databases:	PostgreSQL, MySQL, Supabase (BaaS)
Code Quality & Security:	Code Reviews, RBAC, HMAC-Signed Tokens, Static Analysis (Semgrep), Vulnerability Scanning
Collaboration:	Git, GitHub, Docker, CI/CD, Cross-Team Communication, Mentoring & Knowledge Transfer
Professional Skills:	Analytical & Problem-Solving Skills, Attention to Detail, MS Office, Fluent English

Professional Experience

Tech Lead <i>Clientura</i>	Jun 2025 – Jul 2026 <i>Visakhapatnam, India</i>
--------------------------------------	---

- Collaborated with engineers and clients to define solution designs and break down features into implementable tasks, guiding full-stack delivery across the team.
- Drove code reviews and enforced development best practices, improving code quality and reliability across deployments.
- Coordinated with cross-functional teams, communicated status updates, and triaged priorities to keep production systems stable.
- Mentored interns and junior developers, supporting knowledge transfer and onboarding across the team.

Web Developer Intern <i>BetweenBreaks</i>	Jun 2025 – Sep 2025 <i>Remote</i>
---	---

- Built responsive frontend modules integrated with REST APIs, collaborating with engineers on debugging and feature development.
- Participated in code reviews and testing to maintain functional reliability across the stack.

Projects

WayCode – Mobile Gateway for Autonomous Coding Agents <i>Next.js · TypeScript · Supabase (BaaS) · Redis · Docker</i>	2026
---	-------------

- Designed a mobile-first platform that dispatches natural-language coding tasks to a cloud agent, which clones, edits, builds, and verifies code before mobile review and approval.
- Implemented an asynchronous Redis-backed task queue and real-time telemetry pipeline, using Supabase as the backend-as-a-service layer.

PrepPulse – 90-Day Placement Prep App <i>React Native (Expo) · TypeScript · Supabase (BaaS)</i>	2026
--	-------------

- Built a production-ready mobile app delivering a structured 90-day placement-prep agenda across DSA, full-stack, aptitude, and CS-fundamentals tracks with progress tracking and streaks.
- Integrated authentication and real-time progress sync using Supabase as a complete backend-as-a-service, with push notifications for daily reminders.

KVR Motors – EV Dealership Management SaaS <i>Next.js · Django · PostgreSQL · Docker</i>	2026
---	-------------

- Built a full-stack SaaS ERP platform for EV dealership and vehicle management, deployed to production and containerized with Docker, with client-facing documentation for ongoing support.

Clientura EMS – Employee Management System <i>PHP · MySQL · RBAC · SSL</i>	2025
---	-------------

- Architected a full-stack EMS with Role-Based Access Control (RBAC) and SSL-secured deployment, centralizing workforce data with a focus on secure access management.

Achievements

- **Hackathon Organizer:** Organized a large-scale hackathon, coordinating logistics, judging panels, and technical infrastructure across multiple teams.
- **Certifications:** CCNA (networking), ServiceNow CSA & CAD (platform administration and application development).

Education

B.Tech, Computer Science & Engineering <i>MVGR College of Engineering, Vizianagaram</i>	CGPA: 8.28 / 10.0 <i>2023 – 2027</i>
